Hosted Email & Applications

# Introduction

Some companies have their own in-house Active Directory (AD) to manage users across their in-house applications...

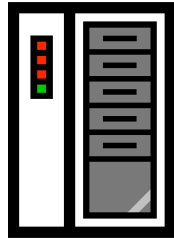

...but there is no connection to the hosted environment.

## What is DirectoryLink?

With DirectoryLink, you now have a directory synchronization tool which enables you to link your in-house AD with the hosted AD.

## Why Buy DirectoryLink?

- ✓ Bridges the gap between on-premise installation and hosted services
- ✓ Allows password management and the same password policies for both on-premise and hosted applications
- ✓ Simplifies user management

# Secure Deployment Architecture

- ❑ Install onto on-premise AD
- ❑ Link users in control panel
- ❑ DirectoryLink is now setup to synchronize

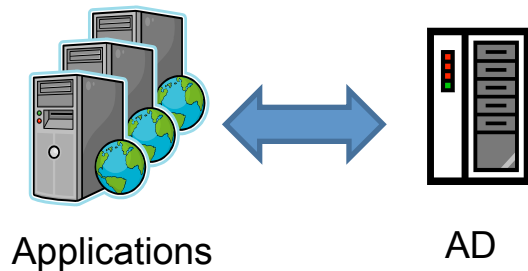

## Conclusion

DirectoryLink is the solution which connects your in-house AD to the hosted environment.
